

MAIN FACS has been providing agencies with one week advance notice of software changes. We were unable to provide this advance notice for the following software changes and apologize for any problems this may cause.

#### **DAFR3831 OUT-OF-SYSTEM PAYMENT ERRORS REPORT AND DAFR386S PAYROLL TRANSACTIONS GENERATOR SUMMARY REPORT MODIFICATIONS**

The DAFR3831 Out-of-System Payment Errors report did not display 'NO RECORDS FOUND' when no records were produced. The report also did not decollate by agency. The program was modified to produce a report that includes the message 'NO RECORDS FOUND' when no records are produced. The modification also resulted in the report decollating by agency.

The DAFR386S Payroll Transactions Generator Summary report did not display 'NO RECORDS FOUND' when no records were produced. The program was modified to produce a report that includes the message 'NO RECORDS FOUND' when no records are produced.

#### **PAYMENT CANCELLATIONS WITH FUND OVERRIDE**

Cancellation transactions did not have fund override which often caused them to error with fund control errors. Now these transactions will have fund override.
